Description

Pair of oval, three-light sterling silver candelabra in the George III style that would have been popular in the late 18th century. The candlesticks are elegantly fluted in the Georgian manner each with a flame or snuffer in the central nozzle. Showing off their versatility, the arm sections can be removed so that the candlesticks can be used separately and both arm sections can be arranged above each other on one stem to make a five-light candelabrum. The capitals have removable drip pans for ease of cleaning.
