Description

Sterling silver rose bowl in a compressed circular form sitting on a spreading circular base and edged with an applied, scalloped decorative rim. The shallow body features simple hand chased panels that decorate the body both outside and inside the bowl. Two cast, hinged handles sit on either side of the bowl and a removable mesh frame sits over the bowl to hold flowers in place.

Of course, removing the mesh frame, the bowl is perfect for other uses in the home such as a fruit bowl.
