Description

Modern Buccellati silver dish hand crafted by the silversmith in the shape of an arum leaf with a beautifully embossed and stippled surface picking out the veins and features of a real leaf. This Italian silver dish is perfect for serving fruit and, on its own, makes a beautiful decorative statement

Founded in Milan in 1919, Buccellati is noted for its traditional engraving techniques and its Italian Renaissance-inspired designs.

The generating power of nature is the inspiration for a collection of Buccellati silver pieces in the form of fruits, leaves and flowers, all shaped and formed to reflect the expertise of the Italian silversmiths.
