Description

Creating a replica of the trophy cup for.....

The client who won the trophy was not satisfied just to have his name engraved on the base; he wanted to own the trophy outright, but this was not posible for obvious reasons. He then chose to have Langfords make an exact recreation of the original. We were permitted to have access to the original RYS Regatta King's Cup for two weeks. Measurements and all minute details gathered to create CAD plans from which our silversmiths could work their traditional skills - casting and chasing to create an exact replica trophy. Even the gold plating was matched for colour correctness.
