Bespoke: sterling silver model cat mounted on a marble plinth

Langfords

REF: 7973

Width: 115 mm (4.53")

Description

As an example of a private commission, this cast model of a Scottish Fold cat was created by Langfords from photographs of the customer's own pet.

We made a wax model by hand, capturing its favourite pose and slightly grumpy facial expression (a trait not repeated in its personality). This wax model was then used to make moulds from which we cast the cat in heavy-gauge sterling silver. The slinky silver cat was mounted on a white marble base with the cat's name carved into the stone.

Length given is for the cat model itself.

Please get in touch to discuss your own ideas; we can make anything in silver.
