Height: 100 mm (3.94")

Weight: 270 g

Description

Unsurprisingly, this solid silver labrador in a familiar sitting pose is one of our most popular silver dog models. It is finely hand chased to give a lifelike appearance. Originating in Newfoundland in the 16th century, the labrador is the most popular of all pedigree breeds.

Our heavy quality models are cast in sterling silver using the traditional, centuries-old technique of lost wax casting where molten silver is poured into a mould that has been created by means of a wax model. Once the silver has solidified, the wax model is melted and drained away. Each of our models is then individually hand chased to produce the lifelike effect seen in the finished piece.

For a truly personal model, we can work from photographs to capture the true likeness of your own pet or favourite animal cast in sterling silver. Contact us for more details.
