Height: 215 mm (8.46")

Depth: 165 mm (6.5")

Weight: 660 g

Description

Perhaps our most popular contemporary silver water jug, H2O water jug was designed by Gabriele De Vecchi in 1975 and is the forerunner to his Minimal range of the 1990s, paying tribute to the highly reflective properties of curved silver surfaces. The form of this silver jug is rectangular but the important features - the olive wood handle, the spout and the strong base - break and soften this outline. An example of this jug is on permanent display at a museum in Ghent. Limited production of 30 per year.
